*Thanks to Susan Sparrow for sharing the idea

6 x 6 Double Sided Printed Paper

1. Cut $\frac{1}{2}$ " away on one side of the 6x6 paper. Score the $5\frac{1}{2}$ x 6" piece at $\frac{1}{2}$ " and $4\frac{3}{4}$ " along the 6" side. Crease the score lines in opposite directions.
2. Cut a $4\frac{1}{4}$ x $5\frac{1}{2}$ " cardstock. (you may wish to cut two to cover the join later)
3. Adhere the cardstock to the $\frac{1}{2}$ " strip, folding to make a card shape. Fold the $1\frac{1}{4}$ " panel towards the card front. Adhere the remaining strip and another spare strip of coordinating cardstock to the flap. Adhere down flat or with dimensionals.
