#### How to get it

The Glass Mat studio is currently available as an addition to the Starter Kit during January or February 2024. It may be available at another time, but I don't know this for a fact. Read more about getting started on my Stampin' Up! team here: [www.stamphappy.co.nz/jointhefun](http://www.stamphappy.co.nz/jointhefun)

## More information about the Glass Mat Studio:

### Silicone Mat-

6 compartments. 4 can hold ink spots, larger compartment can hold a stamp pad.

- Use the compartments for holding water
- Use larger compartment for cleaning blending brushes
- Compartments can be used to hold embellishments
- Compartments can hold re-inker colours for water colouring
- Cleans easily by running it under water and dries easily

Be aware - Darker Colours can stain mat.

### Glass Mat -

- Clear Measurements
- Grid works great for lining up layers
- Grid helps place stamps on blocks straight
- Space to write notes off on the right side (use a dry erase or water based marker)
- Non slip
- Holds the Die cut machine in place while using (both large and small machine)
- Heat resistant for Heat Embossing. It will get a little warm but safe to touch
- Drop ink from re-inkers for techniques.
- Add ink direct from Stamp pad for techniques
- Great for picking up ink for Blending Brushes. Adding ink to glass mat verses picking up from stamp pad saves on ink and is easier to color with.
  
- Ink from Markers can be colored direct to mat for water coloring techniques
- Ink from Blends can be colored direct to mat for Coloring techniques.
- Hold masks in place with washi tape, 3m post its, mask tape to color with blending brushes or paste. Be sure to clean paste off while still moist.
- Cutting with Exacto or take your pic rotary tool will not scratch the surface
- Color embossing paste on the mat with re-inkers. Be sure to clean off before it dries.
- Larger back ground stamps stay in place and works great for inking and stamping with paper on top
- Brayer works great on this hard class surface
- Pastels for coloring techniques
- Great for Reflection stampin and transferring
- Great for shadow technique stamping (stamp off to lighten image to great a shadow)
- Great for Spritzing technique-
- Splatter Technique with Markers or Blends
- Can use PhotoPolymer stamps
- Can use Cling stamps
- Great to stamp off on
- Adhesives can be cleaned off easily with Shammy
- Add a magnetic board underneath and hold things in place with magnets when needed

Be Aware - Noisier as Bracelet or rings can clink on it.

## Cleaning Cloth-

- Lighter weight than Shammy
- Ease of wiping off the whole mat
- Re wet using waterproof
- Nice easy size for use
- Can use rubbing alcohol, water to spritzed on glass mat for cleaning with cloth.
- Reusable
- Little or no pressure needed to clean with
- Consider cutting in half; one for wet cleaning and one for drying.

Be Aware - Stains easily. If you have a lot of ink on your mat and staining bothers you, you may want to wipe up with paper towel or baby wipe first.

If you'd like the Glass Mat Studio added to your starter kit, get started here:
