

Sunburst Background Tip Sheet

Tips:

- Cut 4-6 rectangles out of printed paper or cardstock. A good starting point is 4 x 1 ½", but make them longer, wider, or thinner for different effects. Cut each rectangle in half diagonally. (The length of the rectangle needs to be long enough for the longest ray)
- Make a dot on your base card where you want the sunburst to radiate from. Each will give a different effect (see above)
- Use different sizes of card bases (square, slimline, etc) for more variations.
- Have gaps between the rays or no gaps for a different effect.

See the demonstration video on YouTube at www.youtube.com/stamphappynz and search for “Sunburst Background StampHappy”
